Description:

In 2000, Daniel Suelo left his life savings—all thirty dollars of it—in a phone booth. He has lived without money—and with a newfound sense of freedom and security—ever since. The Man Who Quit Money is an account of how one man learned to live, sanely and happily, without earning, receiving, or spending a single cent. Suelo doesn't pay taxes, or accept food stamps or welfare. He lives in caves in the Utah canyonlands, forages wild foods and gourmet discards. He no longer even carries an I.D. Yet he manages to amply fulfill not only the basic human needs—for shelter, food, and warmth—but, to an enviable degree, the universal desires for companionship, purpose, and spiritual engagement. In retracing the surprising path and guiding philosophy that led Suelo into this way of life, Sundeen raises provocative and riveting questions about the decisions we all make, by default or by design, about how we live—and how we might live better.

First off, this is not a survivalist book or story. It is the life story of one man and his experiences told through the eyes and experiences of the author, other people the author interviewed and from the writings of the subject himself. It starts with him living without money but almost immediately becomes a tale of how he got to that point in his life—his mental thoughts and travels and various attempts to become one who can live moneyless. Although he himself quits money his entire story is one of a person living off of the largess of money and what it can and does buy—basically the excess of capitalism, without which he would not have been able to do what he has. Keep in mind that this is not a formula to book. The reality is his story is one of lifestyle choice. One can chose to live a life of less income or pursue one of more income. The reality is the lifestyle(s) that go with those varying degrees of income are the output, some may say consequences, of those choices. Towards the end the author gets into the typical platitudes that predict things like peak oil and the downfall of the American capitalistic system, citing specific occurrences that never resulted in the social impact the author predicts. As for the writing I found it moved the story along—in the beginning slowly, the main part of the book at a nice pace, with the ending slowed down again. The author did a good job keeping things interesting but quite often I felt like he was either overdramatizing the incidents or relating stories that the subject presented without questioning their authenticity or degree of reality (especially the religious moments).
